## 2.4 The NEET adjusted percentage and numbers are calculated using the following formula:

- DfE research determined that from those who lapsed from EET 92% were likely to still be EET and so the remaining 8% would be counted as NEET. For those who had lapsed from NEET, 58% were likely to have re-joined NEET and so the remaining 42% would be EET.
- This calculation is then applied to those who have lapsed to produce the adjusted NEET percentage.
- The adjusted lapsed figures are added back into the EET and NEET cohorts, the numbers are re-calculated (NEET/EET + NEET).
